

Optimize Warehouse Operations

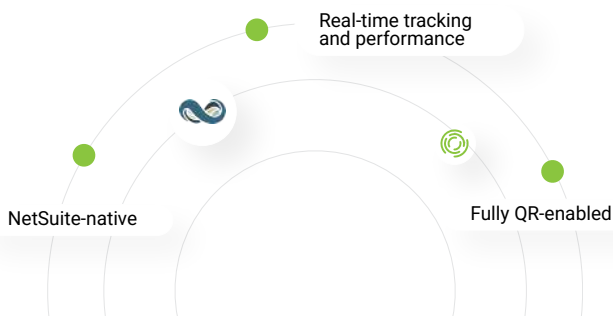

Smarter Inventory Management with QR-Enabled Processes

IMA (Inventory Management Automation) by Bring IT is a mobile-friendly, QR-powered solution that enhances WMS to deliver real-time accuracy, faster transactions, and seamless warehouse workflows.

Streamline inventory, transfers, WIP, and picking operations—all with a single scan.

Simplifying Inventory from Start to Finish:

Simplify complex tasks with:

- ✓ QR Inventory Transfers & Bin Management
- ✓ QR Work Order Completion & FIFO Consumption
- ✓ One Scan Receiving & QR Print & Move
- ✓ Inventory Count Automation
- ✓ Real-time Inventory Creation
- ✓ QR-Powered Shipping (Picking)

Improve Efficiency. Eliminate Errors. **Go Digital.**

Get full visibility and traceability across your supply chain—automated, fast, and accurate. Empower your team with real-time tools that reduce errors and boost productivity.

Perform inventory tasks effortlessly

Whether online or offline, field and warehouse staff can:

-  Scan & complete Work Orders
-  Count, move, and receive inventory
-  Pick & ship faster with guided tasks
-  Eliminate manual entry

Current features:

-  QR-driven transfers: Bin-to-Bin, Cart, Transfer Orders
-  One Scan Receiving with BoL
-  WIP Completion with FIFO logic
-  QR Picking with optimized routing
-  Full Inventory Count automation
-  Print & Move: Labels + transfers in one step
-  100% mobile, real-time data sync with NetSuite
